Can you use organic color systems on a client undergoing chemotherapy?

Sadly we don't advise that you use Organic Color Systems on clients undergoing chemotherapy, radiotherapy or other forms of treatment. You should always speak to your doctor. If your scalp is damaged, very dry or irritated, or your hair is brittle you should always do a strand test or wait to color the hair.

How soon after chemotherapy can I start coloring my hair?

Always consult with your doctor before coloring your hair. And for people who do not want to color right away we have a semi-permanent (NO LIMITS) line that can be used at home as a color rinse.
